

RIZAL WIDIANTO NUGROHO

Software Developer Intern Candidate

Bekasi City, Indonesia | +62 898-8761-990 | rizalwidiyanto232@gmail.com | [linkedin.com/in/rizal-widiyanto](https://www.linkedin.com/in/rizal-widiyanto) | github.com/jalll06

PROFESSIONAL SUMMARY

Information Systems student (6th semester) at Universitas Bina Sarana Informatika with hands-on, self-directed experience in web development and digital design. Comfortable building web applications from scratch using HTML, CSS, and JavaScript, with additional exposure to Node.js, REST APIs, and MySQL through personal and coursework projects. Also experienced in producing AI-generated visual assets as an Adobe Stock contributor and in independently launching digital products. Seeking a Web/Software Developer internship to apply technical skills in a real-world environment and grow within a professional team.

SKILLS

- Web Development: HTML5, CSS3, JavaScript, responsive web design, Tailwind CSS
- Backend & Data: Node.js, Express, REST API, MySQL, basic database design
- Tools: Git/GitHub, Figma, Vercel (deployment), Chart.js
- Design & AI Tools: Adobe Firefly, Midjourney/ChatGPT (AI image generation), UI/UX fundamentals
- Other: Independent project management, problem solving, self-taught learner

PROJECTS

SM Sport Center — Online Sports Field Reservation System

GitHub: github.com/jalll06/web-reservasi | Live Demo: smsport-three.vercel.app/

- Built an online reservation system for sports facilities with real-time schedule availability checks.
- Implemented JWT-based authentication, an admin dashboard, and Midtrans payment gateway integration.
- Tech stack: JavaScript, Node.js API, MySQL, Tailwind CSS.

PlayStation Rental & Catalog System ("Mado")

GitHub: github.com/jalll06/project-basis-data | Live Demo: project-basis-data-mado.vercel.app/

- Developed a web application for renting PlayStation consoles (PS3, PS4, PS5) as an individual database-course project.
- Implemented a login authentication form, a console catalog, and a rental transaction form.
- Tech stack: HTML5, CSS3, JavaScript, relational database design.

Task Management App

- Built a collaborative to-do list application with drag-and-drop task management and user authentication as a self-directed learning project.
- Tech stack: JavaScript, Express, REST API.

EXPERIENCE

AI Content Contributor (Freelance) | Adobe Stock Contributor Program

Ongoing

- Create and upload AI-generated image assets for commercial use on the Adobe Stock marketplace.
- Write product descriptions and metadata aligned with platform standards to improve visibility and sales.

Independent Digital Product Developer | Self-Employed

2026 - Ongoing

- Designed and built landing page templates (HTML/CSS/JS) sold as downloadable digital products.
- Developed AI-generated character sticker packs, covering ideation, image generation, editing, and packaging for sale.
- Managed the end-to-end digital product sales process, including market research, pricing, and promotion.

EDUCATION

Bachelor of Information Systems | Universitas Bina Sarana Informatika

6th Semester (In Progress)

ADDITIONAL INFORMATION

- Portfolio website features an overview of all projects, skills, and background (source code available on GitHub).
- Languages: Indonesian (native), English (basic to intermediate, reading/writing technical documentation).
- Available for internship placements, remote or on-site, starting immediately.
- Quick learner and highly adaptable to new technologies and tools as required by the team.
- Comfortable working independently as well as collaboratively in a team environment.
